Caring for Norwex Microfiber

- Slightly dirty microfiber can be washed with Norwex Dishwashing Liquid under warm running water and used again before laundering. Rinse thoroughly after washing and air or machine dry.
- Cloths that have been used heavily should be laundered using a Norwex laundry detergent, which contains no fillers, after each use.
- For tough stains, please pre-treat with Stain Remover or use Microfiber Cleaner Laundry Booster.
- Do not use bleach. Do not use fabric softeners or dryer sheets when laundering microfiber as these additives coat the fibers and reduce their ability to clean effectively.
- Launder dark colours separately.
- Between launderings, use our Rubber Brush to remove dirt from Dry Mop Pads, Entry Mat and EnviroWand™.
- When using on easily scratched surfaces such as brushed stainless steel, first test Norwex Microfiber on an inconspicuous spot.
- For best cleaning results, Norwex Microfiber should be machine-dried after laundering.
- Do not use microfiber (except Norwex Optic Scarf and Tech Cleaning Cloth) on anti-glare surfaces.
